THE PROVISION MADE BY MATHEMATICS FOR THE NEEDS OF SCIENCE¹

CONTENTS

<i>The Provision made by Mathematics for the Needs of Science:</i> PROFESSOR R. D. CARMICHAEL	465
<i>Scientific Events:—</i>	
<i>The Gauthiot Memorial; Awards by the Franklin Institute; The American Ceramic Society and Military Preparedness; Washington Offices of the National Research Council</i>	474
<i>Scientific Notes and News</i>	476
<i>University and Educational News</i>	479
<i>Discussion and Correspondence:—</i>	
<i>Where do Pitcher-leaved Ash Trees grow?</i> PROFESSOR GEORGE H. SHULL. <i>Keep Your Eye on the Ball:</i> PROFESSOR GORDON S. FULCHER. <i>The Tenth-exponent:</i> FRANK W. BALL. <i>Chemical Publications:</i> PROFESSOR ALEXANDER SMITH	479
<i>Quotations:—</i>	
<i>Scientific and Classical Education</i>	481
<i>Scientific Books:—</i>	
<i>Stiles's Human Physiology:</i> PROFESSOR F. H. PIKE	482
<i>Goodale's Experiments on Gonadectomy of Fowls:</i> PROFESSOR T. H. MORGAN	483
<i>Special Articles:—</i>	
<i>The Behavior of Certain Gels Useful in the Interpretation of the Action of Plants:</i> DRs. D. T. MACDOUGAL AND H. A. SPOEHR.	484
<i>Societies and Academies:—</i>	
<i>The American Mathematical Society:</i> PROFESSOR F. N. COLE	488

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

MATHEMATICS beyond the merest elements has been regarded by some as an excrescent malady of the human spirit, generated like the pearl in an abnormal and morbid way and representing a non-living embedment in the active tissue of the organism of society; by others it has been supposed to exhibit the highest intellectual reach of mankind, being in itself the most powerful tool yet devised for the interpretation of natural phenomena, while at the same time it affords a satisfying expression of the furthestmost esthetic attainment. On the one hand, it is considered a piece of jugglery in which it is the joy of the proficient to produce more and more complicated entanglements to astonish the beholder and overwhelm him with the sense of mystery; on the other hand, it is seen to be the systematic unfolding of remarkable and important properties of a highly fascinating creation or construction of the human spirit by means of which it has at once its most intellectual delight and the best means of understanding its environment. Some workers seem to resent the interference of mathematics with their comfort in the conclusions of descriptive science and its demands that observation shall be reduced to measurable elements and the laws of nature be expressed in mathematical formulas; other thinkers believe that natural science is real science only in so far as it is mathematical, that it is only through mathematics that true science can

¹ An address delivered before the Illinois Chapter of Sigma Xi on January 17, 1917.
