

Cornell University Medical College

First Avenue and Twenty-eighth St.
NEW YORK CITY

The first year of the course is also offered at Ithaca, N. Y., subsequent years at New York City only.

For information address
THE SECRETARY

Johns Hopkins University Medical School

The Medical School is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with at least two years' instruction, including laboratory work in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to 75 students, men and women being admitted on the same terms. Except in unusual circumstances, applications for admission will not be considered after July 1st.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill our requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition is \$300 per annum, payable in three installments. There are no extra fees except for rental of microscope, certain expensive supplies, and laboratory breakage.

The annual announcement and application blanks may be obtained by addressing the

Dean of the Johns Hopkins Medical School,
Washington and Monument Sts., Baltimore, Md.

Summer Work for Graduates in Medicine

Beginning Monday, June 2d, and ending Saturday, July 12th, a course in medical diagnosis, including laboratory exercises in clinical pathology and demonstrations in pathological anatomy, will be offered. The course will be limited to thirty students, fee \$100. Applications should be made to the Dean's Office.

RUSH MEDICAL COLLEGE IN AFFILIATION WITH THE UNIVERSITY OF CHICAGO

Curriculum.—The fundamental branches (Anatomy, Physiology, Bacteriology, etc.) are taught in the Departments of Science at the Hull Biological and the Ricketts Laboratories, University of Chicago. The courses of the three clinical years are given in Rush Medical College and in the Presbyterian, the Cook County Hospital, the Home for Destitute Crippled Children, and other hospitals.

Requirements for Admission.—Three years of pre-medical college work.

Classes Limited.—The number of students admitted to each class is limited, selection of those to be admitted is made on the basis of merit in scholarship and other qualifications requisite for the study and practice of medicine.

Hospital Year.—The fifth year, consisting of service as an interne under supervision of the faculty in an approved hospital, or of advanced work in one of the departments is prerequisite for graduation.

Summer Quarter.—The college year is divided into four quarters, three of which constitute an annual session. The summer quarter in the climate of Chicago is advantageous for work. Students are admitted to begin the medical courses only in the Autumn and Spring quarters.

Elective System.—A considerable freedom of choice of courses and instructors is open to the student.

Graduate Courses.—Advanced and research courses are offered in all departments. Students by attending summer quarters and prolonging their residence at the University of Chicago in advanced work may secure the degree of A.M., S.M., or Ph.D., from the University.

Prize Scholarship.—Six prize scholarships—three in the first two years and three in the last two (clinical) years—are awarded to college graduates for these embodying original research.

The Winter quarter commences January, 1924.

Tuition—\$80.00 per quarter, no laboratory fees. Complete information may be secured by addressing:

THE MEDICAL DEAN
The University of Chicago Chicago, Illinois

Stanford University California

SUMMER QUARTER, 1924

Tuesday, 24 June, to Saturday, 30 August

Second half begins 28 July

Opportunities to work for the A. B. and for higher degrees, or to do special work, in the oceanic climate of the San Francisco peninsula.

Courses in the regular academic and scientific branches, and in law.

Information from Office 53.

STANFORD UNIVERSITY

LANGMUIR

Mercury Condensation
High Vacuum Pump.

Glass Design

This pump is specially designed for College, University and Experimental Laboratories. It is made entirely of Pyrex glass and is intended for use where the higher speed and greater volume obtainable with the all-metal Langmuir Pump is not needed. It will produce a vacuum of .000002 mm. of mercury quite readily, at a speed of 500 to 600 c.c. per second. Some form of backing pump must be used, and for this purpose a vacuum of 0.1 mm. or lower is recommended. A special mercury heater is available.

NUTRITION PRODUCTS

STANDARDIZED

BY THE WHITE RAT METHOD

To conserve the time of investigators, we supply the following essential food factors and food mixtures to Universities and state Departments, Experiment Stations and Laboratories of the U. S. Government.

Yeast Vitamine—Harris (Tablets)—Each Tablet contains 200 mgms of concentrated Vitamine-B fraction, from Brewers' Yeast (Described by Osborne & Wakeman, Jr. Biol. Chem., Dec., 1919). Widely used as a food supplement or auxiliary food factor. Valuable as a stimulant to the appetite and metabolism of the sick, convalescents and the young.

(See: Gerstenberger: Amer. Jr. Diseases of Children, Oct., 1923.)

Yeast Vitamine—Harris—Vitamine-B, concentrated fraction, from Brewers' yeast, described by Osborne and Wakeman, Jr., Biol. Chem., Dec., 1919. Most potent preparation of Vitamine-B available for feeding experiments. Stimulates the appetite. See:—Cowgill, Proc. Soc. Exp. Biol. and Med., 1922, xix, 282. Powder. For experimental animals or bacteriological media.

Yeast; dried, powdered—Fresh Brewers' yeast, washed, vacuum dried, powdered. Standardized for its Vitamine-B value. See: Evans and Bishop, Jr., A. M. A., Sept. 15, 1923.

Cod Liver Oil—Harris—Physiologically standardized for its fat-soluble-A content. Prevents or cures Rickets. Used as a standardized source of Vitamine-A. The first Cod Liver Oil with a Vitamine standard.

Casein—Harris—Free from water-soluble, Vitamine-B. Standardized by feeding to growing white rats.

Casein—Harris—Free from Vitamines A and B is of very high purity, both chemically and physiologically. Chemically analyzed and Biologically standardized. No other casein of this quality is available.
