## JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

### ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

### INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

### TUITION

The charge for tuition is \$400 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

## Your Laboratory Ally

**I**N \*PYREX Laboratory Glassware you have apparatus—unyielding to heat—indifferent to abrupt changes from hot to cold or from cold to hot—immune to the attack of the usual reagents—and ruggedly able to withstand constant and hurried handling. Apparatus that will leave you free to work, unhampered by constant breakage.

No wonder PYREX Laboratory Glassware has won the confidence and appreciation of chemists throughout the world. It is the one make of glassware upon which they can depend.

\* Trade-mark Reg. U. S. Pat. Off.

A remarkably low coefficient of expansion enables it to resist high temperatures and sudden cooling. It has great chemical stability. Its walls are heavier than any other make of laboratory glassware. Each piece is thoroughly tempered.

Equip your laboratory through-

out with PYREX Glassware. There is a piece and size for every need.
