JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition is \$400 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

CLEVELAND

NEW SCIENTIFIC BOOKS

Ginn and Company, Boston

AN INTRODUCTORY TEXT-BOOK OF ELECTRICAL ENGINEERING. John Robert Benton. pp. xi+347. \$3.60.

An elementary text-book for the use of students who have some knowledge of college physics and mathematics through elementary calculus. It is intended to give a brief general acquaintance with the more important principles and facts of electrical engineering.

A COURSE IN GENERAL BIOLOGY. Henry S. Pratt. pp. viii+178. \$1.48.

This manual is for use in laboratory courses in general biology. It is not intended to take the place of a text-book of biology or of lectures, but to aid both the teacher and student in the practical work of the class.

The Oxford University Press, American Branch,
New York

FOOD AND HEALTH. A. Barbara Callow. pp. 8+96. Illustrated. \$1.00.

Written for the beginning student and the general reader, this book shows the relationship between food and healthful living. Some chapters are: The chemical nature of food-stuffs, Patent foods, How to arrange a diet, Food as a cure for disease.

John Murray, London, England

LIGHT. Vivian T. Saunders. pp. vii + 320.

For students who are following an elementary but formal course in light. It covers the ground required for most of the examinations which are taken during the school period, though no particular examination syllabus has been allowed to control the structure of the book.

PROFESSOR

Your manuscript or notes can be published by the photographic-zinc-plate process. We print on both sides of a page, reduce to desired size and bind in book form. Write for our booklet and prices.

SHELWOOD-HILL, Inc.,
50 Church St., N. Y. C.

Hy-Speed Mixers

Clamp to any tank, operate from light circuit, mix all kinds of liquids. Also used for even temperature baths. Thousands in use.

Write for circular.

ALSO ENGINEERING CO.
47 W. 63rd St., New York

JAGABI RHEOSTATS

meet a definite need in Educational, Research and Industrial Laboratories.

By means of sliding-contacts the resistance values can be varied from zero to full rating, in exceedingly small steps.

We find greatest demand for Rheostats with tubes 18" long, as illustrated above.
Write for Descriptive Catalog 1140-S.

National Research Fellowships in the Biological Sciences

Post-doctorate fellowships in the biological sciences (Zoology, Botany, Anthropology and Psychology) will be assigned by the Board of National Research Fellowships in the Biological Sciences for the academic year 1928-29 at a second meeting of the Board to be held about the last of May. Applications for consideration at this meeting should be filed by April 15th. Appointments may be made prior to the conferring of the doctor's degree, to be effective upon the receipt of the degree within at least six months of the date of appointment. Forms of application and statement of conditions will be furnished on application by mail or by wire to the *Secretary, Board of National Research Fellowships in the Biological Sciences*,

National Research Council
Washington, D. C.

A Personal Service for INVENTORS

I maintain an unexcelled organization and thoroughly equipped laboratories, to render the following services:

I PREPARE APPLICATIONS for patents for filing in the United States and foreign countries.

I PLACE INVENTIONS with responsible manufacturers, with whom I am acquainted, under arrangements that are made profitable to the inventor.

I SPECIALIZE in Electrical, Mechanical, Chemical and Radio Devices.

I INVITE CORRESPONDENCE with reputable Inventors, Scientists, Chemists and Physicists, regarding their inventions and uncompleted experiments.

WANTED

Experienced salesman to sell scientific instruments for leading domestic manufacturer. Good prospects for right man. Address: "A. H. E.," care of The Science Press, 3939 Grand Central Terminal, New York, N. Y.

WANTED--ANATOMIST

An M.D. or Ph.D. with thorough training in microscopic and gross anatomy. Beginning salary \$2,500. Address, D. J. L. Worcester, University of Washington, Seattle, Washington.

When you need ultra-violet light

Made of quartz glass fabricated from the best of Brazil Rock crystal supplied by the Lynn works of the General Electric Company.

NO simpler or more dependable source of ultra-violet light is available today than the rugged quartz-tube Uviarc, perfected through the skill and research work of G. E. and Cooper Hewitt engineers.

This compact and closely-enveloped unit requires no cooling-fins, for cooling is by direct radiation from the electrodes. The anode is of purest tungsten. Absence of complication is a notable feature.

Uviarcs are designed especially for use in photochemistry, as catalyzers or ionizers, for hydrogenation and halogenation of organic substances, deblooming of oils, "aging" of finishing materials, fading tests of dyes, sterilization and many other purposes.

Write us for particulars on specific applications.

Cooper Hewitt Electric Company, 873 Adams St., Hoboken, N. J.
