

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in **AUTHORS' ABSTRACT** form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology
The American Anatomical Memoirs
Folia Anatomica Japonica (Tokio, Japan)
Stain Technology (Geneva, N. Y.)
Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

Subscriptions to the Bibliographic Service and orders for reprints should be sent to

The Wistar Institute of Anatomy and Biology

Thirty-sixth St. and Woodland Ave. Philadelphia, Pa.

**JOHNS HOPKINS UNIVERSITY
SCHOOL OF MEDICINE**

The School of Medicine is an Integral Part of the University and is in the Closest Affiliation with the Johns Hopkins Hospital.

ADMISSION

Candidates for admission must be graduates of approved colleges or scientific schools with two years' instruction, including laboratory work, in chemistry, and one year each in physics and biology, together with evidence of a reading knowledge of French and German.

Each class is limited to a maximum of 75 students, men and women being admitted on the same terms. Applications may be sent any time during the academic year but not later than June 15th.

If vacancies occur, students from other institutions desiring advanced standing may be admitted to the second or third year provided they fulfill the requirements and present exceptional qualifications.

INSTRUCTION

The academic year begins the Tuesday nearest October 1, and closes the second Tuesday in June. The course of instruction occupies four years and especial emphasis is laid upon practical work in the laboratories, in the wards of the Hospital and in the dispensary.

TUITION

The charge for tuition for 1929-30 will be \$600 per annum, payable in two installments. There are no extra fees except for certain expensive supplies, and laboratory breakage.

Inquiries should be addressed to the

Executive Secretary of the School of Medicine, Johns Hopkins University, Washington and Monument Sts., Baltimore, Md.

Graduates in Medicine who satisfy the requirements of the heads of the departments in which they desire to work are accepted as students for a period not less than three quarters. Tuition charge is \$50 a quarter.

**THE ORGANIZATION OF KNOWLEDGE
AND THE SYSTEM OF THE SCIENCES***By Henry Evelyn Bliss*

With an introduction by JOHN DEWEY

DR. VERNON KELLOGG

"Speaking from the point of view and experience of a man of science, I believe Mr. Bliss has made a useful contribution to the organization of science."

PROFESSOR BURTON E. LIVINGSTON

"I think you have made a very excellent presentation of the need and the problem. . . I am sure that our science and library systems can be greatly improved and that such improvement is fundamental to further progress. . . Needless to say, I think your work will be very valuable."

A basis for synthesis in science and for correlation of studies in education is the main purpose of this book. It is the first to treat this great subject adequately, with due regard to the scientific and philosophic grounds and to the historical, social-economic, and educational relations.

Part I shows the dependence of social and economic organization on the organization of knowledge, and the importance of libraries in this, and in libraries the need for better classification of books. Part II states clearly the grounds, principles, and forms of classification. Part III surveys constructively the system of knowledge. Part IV is a brief historical outline of the system of knowledge. \$5.00

*A most useful book for the scientist***HENRY HOLT AND COMPANY, INC.**

One Park Avenue

New York City

Journal of the Optical Society of America and Review of Scientific Instruments

Published monthly by the *Optical Society of America* in co-operation with the *Association of Scientific Apparatus Makers of the United States of America*

CONTENTS FOR APRIL, 1929

Intensity Relations in the Spectra of Titanium.
II. Relative Intensities of the Stronger Multiplets of Ti.

Instruments

On Some Vacuum Recording Gauges.
A Modified Pirani Vacuum Gauge.
On the Ultramicrometer of Dowling.
A Circuit Breaker for Water-Cooled X-ray Tubes.
Triboelectricity of Quartz and Mercury.
A Modification of the Spectrophotometer for Obtaining Measurements on the Reflection of Light from Living Materials.
A Null Method for Measuring the Strength of a Magnetic Field.
Apparatus and Methods for Preparing Very Clean Mercury.
Apparatus for Studying Newton's Second Law.

Subscription \$5.00 per year

Laboratory Hints from the Literature

A new department of the above name
has been added recently to the journal

STAIN TECHNOLOGY

It gives interesting new methods in microscopy that have been noticed in other publications.

STAIN TECHNOLOGY is a quarterly journal devoted to biological stains and microscopic technic, published by the *Commission on Standardization of Biological Stains*. Subscription \$1.50 a year. (Back numbers since Jan. 1, 1926, available at same rate.)

Send orders to the Chairman of the
Commission

A NEW JOURNAL OF PHYSICS THE PHYSICAL REVIEW SUPPLEMENT

Issued Quarterly by the

AMERICAN PHYSICAL SOCIETY

and devoted to

Studies in Contemporary Physics

Contents of First Issue, July 1, 1929

Values of the General Physical Constants

—R. T. BIRGE

Statistical Theories of Matter, Radiation
and Electricity

—K. K. DARROW

Evidences for the Corpuscular Character of
Radiation

—A. H. COMPTON

These articles will appeal especially to high school, college and university teachers of Physics and Chemistry. They will be written so that those who are not specialists will receive a clear, interesting and reliable view of those things which make contemporary Physics so fascinating.

Those who subscribe prior to July 1 will receive an off-print on stiff cardboard of the tables of physical constants as evaluated by Birge.

Subscription rate \$4.00 per year

(To members of the American Physical Society or American Chemical Society, \$3.00 per year.)

Physical Review Supplement

John T. Tate, Editor, University of Minnesota
Minneapolis, Minnesota

PHOTO-ELECTRIC CELLS THE BURT CELL

Without Fatigue—Highly Sensitive
Absolutely Reproducible—Instantaneous in Response

The BURT-CELL is made by a new method and should not be confused with any other photo-electric cell. By a special process of electrolysis, the photo-electric metal is introduced into a highly evacuated bulb directly through the glass wall of the bulb, giving photo-electric material of absolute purity. The superiority of the BURT-CELL is due to these features, making possible results never before obtainable.

Described in Bulletin No. 271

QUARTZ CELLS—We are pleased to announce that we are manufacturing reproducible quartz photo-cells for measurement of ultra-violet.

We also manufacture the STABILIZED OSCILLOSCOPE—the only VISUAL OSCILLOGRAPH having a linear time axis and no inertia—giving an accurate picture of high frequency wave forms. This is a most powerful tool for the study of periodic phenomena.

A new second edition of

BOTANY

Principles and Problems

By Edmund W. Sinnott

Professor of Botany, Barnard College, Columbia University

McGraw-Hill Publications in the Agricultural and Botanical Sciences.

ONE hundred and eighty-five colleges adopted the first edition of this "question-problem-discussion" text. The book was widely welcomed as an important forward step in the presentation of the essential facts which should find their place in an elementary botany course.

In this new second edition the entire text has been carefully rewritten and brought up to date.

The text has been somewhat increased in length, but not markedly so.

The number of illustrations has been increased considerably.

The questions for thought and discussion have been thoroughly revised and some new ones included, although the total number has been slightly reduced.

The reference problems have been considerably increased in number.

The author says, "As before, the text is primarily adapted to one-semester courses, but I have used it this year in a full year's course and have found plenty of material in it. I feel that it can readily be used both for shorter and longer courses, depending on the amount of time devoted to the questions and problems."
