No. 1798

NAVAL RESEARCH¹

CONTENTS

<i>Naval Research</i> : CAPTAIN C. S. MCDOWELL	607
<i>Some New Fundamentals in Plant Biology, Agriculture and the Food Problem</i> : DR. O. W. WILLCOX	609
<i>Scientific Events</i> : <i>A Biological Study of Neritic Waters in the Gulf of Maine; Work of the Rockefeller Foundation; Gift to New York University Medical School; The International Corn Borer Conference; The Texas Academy of Science</i>	613
<i>Scientific Notes and News</i>	616
<i>University and Educational Notes</i>	620
<i>Discussion</i> : <i>Glacial Geology and the Vermont Flood</i> : PROFESSOR JULIUS W. EGGLESTON. <i>The Species of Paramecium and the Thyroid Question</i> : PROFESSOR WALDO SHUMWAY. <i>The Smelt in Lake Michigan</i> : CHARLES W. CREASER	621
<i>Quotations</i> : <i>Humphry Davy</i>	623
<i>Scientific Books</i> : <i>Eddington on the Nature of the Physical World</i> : PROFESSOR LEIGH PAGE	624
<i>Scientific Apparatus and Laboratory Methods</i> : <i>Practical Hints in the Laboratory Studies of Protozoa and Earthworm</i> : T. T. CHEN	626
<i>Special Articles</i> : <i>The Photoelectric Effect as Related to the Size and Surface Conditions of Carbon Particles</i> : L. G. MORELL and WESLEY E. THOMAS. <i>The Effect upon Digitalis purpurea of Radiation through Solarized Ultra-violet-transmitting Glass</i> : ADELIA MCCREA. <i>Chromosome Morphology in Zea mays</i> : BARBARA MCCLINTOCK	627
<i>Philadelphia Meeting of the American Association of Museums</i> : DR. LAURENCE VAIL COLEMAN	630
<i>Science News</i>	x

SCIENCE: A Weekly Journal devoted to the Advancement of Science, edited by J. McKeen Cattell and published every Friday by

THE SCIENCE PRESS

New York City: Grand Central Terminal.
Lancaster, Pa. Garrison, N. Y.
Annual Subscription, \$6.00. Single Copies, 15 Cts.

SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

WHEN the war ended ten years ago there was a universal feeling throughout the civilized world that there must not be another war. I am sure that such feeling still persists among intelligent, thinking people. There is, though, a group who think that the way to prevent future wars is for our country to set an example to the world by disarming, and who, I believe, would desire to have each individual in the country sign a pledge not to take part in a future war. This group is, in the main, made up of patriotic citizens who are actuated by an honest desire to have affairs between nations settled without resorting to war. They have not, however, in my opinion, sufficiently studied history, nor have they properly taken into account human nature and national hysteria.

There is another group who just as earnestly desire peace, but who believe that the best guarantee for peace is an efficient, prepared navy for enforcing national policies and protecting national ideals.

Our navy plays the same part in international affairs, in being the force behind our international policies and our interpretations of international law, as do the national enforcement agencies and local police in making effective national and local laws.

We have gradually adopted or developed certain policies which we believe express our American ideals. Among others, these include the Monroe Doctrine, the open door to the world's markets, the freedom of the sea and the freedom of the Panama Canal. The Monroe Doctrine has been considered so vital for the peace and security of this country that we have always refused to consider it a subject of arbitration in any international court. President Roosevelt stated a fact in saying, "The Monroe Doctrine is as strong as the United States Navy, and no stronger."

The causes of war are many; among others may be mentioned the pressure of increasing populations and national desires for obtaining greater resources as represented by natural or artificial wealth. Any steps the pacifists can take which will tend to harness the above forces will be welcomed by every one; but, as long as these forces remain uncontrolled, the possibility of war must be recognized. It is easy to scrap navies and disband armies, but it is not so easy to control the causes of war.
