Manila, P. I.

The Wistar Institute Bibliographical Service

is of invaluable assistance to

Librarians—Investigators—Teachers

It brings to them, in **AUTHORS' ABSTRACT** form, a brief review of all original papers on Biological Subjects which appear in the following journals:

Journal of Morphology and Physiology
The Journal of Comparative Neurology
The American Journal of Anatomy
The Anatomical Record
The Journal of Experimental Zoology
American Journal of Physical Anthropology
The American Anatomical Memoirs
Folia Anatomica Japonica (Tokio, Japan)
Stain Technology (Geneva, N. Y.)
Physiological Zoology (Chicago, Ill.)

Advance Abstract Sheets

issued semi-monthly, bearing Authors' Abstracts without bibliographic references, offer a practical means of making research immediately available in abstract form and of purchasing articles of special interest in reprint form without the necessity of subscribing to all the journals. Subscription, \$3.00 per year.

Bibliographic Service Cards

with complete bibliographic references, printed on Standard Library-catalogue cards, are of value and assistance to Librarians and Investigators. Subscription, \$5.00 per year.

Abstracts in Book Form

referred to above, are brought together periodically, with Authors' and Analytical Subject Indices. Price \$5.00 per volume.

Subscriptions to the Bibliographic Service and orders for reprints should be sent to

Tips for a Scientifically Minded Santa Claus

THE Christmas remembrance of a new piece of mental furniture is a subtle compliment to the recipient—especially so if the book is not one of those read as a social obligation, but as a true means of mental grace.

Medicine: Its Contribution to Civilization

Therapeutic science is taken for granted. But obviously its bent and trend profoundly affects the social order, and the conditions of living. This is a book for non-professional people as well as for doctors. Handsomely bound, it looks like a Merry Christmas. The vital story is entertainingly told by Edward B. Vedder. \$5.00.

Sir Isaac Newton

The bi-centenary volume in which a dozen scholars join, each to treat of one phase of Newton's many-sided career. Biography is ever-popular, ever-stimulating. And this biographical study of "the most profound intellect in history" will delight any lover of the intellectual doings of his fellows. \$5.00.

The Ordinal of Alchimy

A breath from the science of yesterday. Written by Thomas Norton in the 15th century and done in facsimile in a delightful antique binding. Illustrated with excellent wood-cuts. A naive mixture of science and piety, done in blank verse. A prize for any library. \$2.50.

Research Narratives

A bigger dollar's worth than is easily found elsewhere. Fifty snapshots of the progress of science, told by the "men who did it" and gathered by Director Flinn of Engineering Foundation. A half-hundred five-minute stories of invention, discovery and research. \$1.00.

The Doctor in Court

Humor, pathos, criminal psychology and human interest are combined in this close-up of court practice from the viewpoint of the "expert witness." The style is conversational and anecdotal; the narrative as fascinating and objective as a detective story. \$3.00.

McGraw-Hill

announces

A New Second Edition of
GEOLOGIC STRUCTURES

BY BAILEY WILLIS

Professor Emeritus of Geology, Stanford University

AND ROBIN WILLIS

518 pages. 5 x 7½. 164 illustrations. Flexible binding

\$4.00

THIS book gives a thorough, authoritative description of rock formations and discusses the application of principles of mechanics to their interpretation.

This new second edition contains all of the original text, revised and rewritten, together with considerable new matter added to broaden its usefulness.

Sedimentary processes are given consideration. The action of vertical forces is discussed and warped structures are described. Igneous and metamorphic structures are more fully considered. The chapters dealing with mechanical principles as applied to the analysis of structures have been rewritten. The substance of the original work, thus revised, is included in Sections I and II.

Section III deals with methods of attack and comprises the original chapter on field methods, together with the chapter on graphic methods and practical problems, the latter being added to.

The treatment of the general subject, geologic thought, has been materially amplified by an account of the current theories of the origin of the earth and its dynamical development, taken up in Section IV.

PATHOGENIC MICROÖRGANISMS

For Students, Physicians and Health Officers

By WILLIAM H. PARK, M.D. ANNA W. WILLIAMS, M.D. and CHAS. KRUMWIEDE, M.D.
 Professor of Bacteriology and Hygiene, University and Bellevue Hospital Medical College; Director, Bureau of Laboratories, Department of Health, New York City
 Assistant Director, Bureau of Laboratories, Department of Health
 Assistant Director, Bureau of Laboratories; Associate Professor of Bacteriology and Hygiene, University and Bellevue Hospital Medical College

Octavo, 819 pages, with 216 engravings and 9 full-page plates. Cloth, \$6.50, net

Again the many additions to the science of bacteriology during the past five years have necessitated a very extensive revision of this well-known text. Many parts of the book have been completely rewritten. The sections on Immunity have been amplified. The experience of the authors to date with active immunization against Diphtheria and Scarlet Fever is given. Not only are the immediate practical results emphasized, but also those observations which bear on the general problems of Immunity. The chapters on the Pyogenic Cocci, on the Paratyphoid-Enteritidis Bacilli, and on the Pneumococci have been practically rewritten. Recent additions to the knowledge of Scarlet Fever, Measles, Yellow Fever, Undulant Fever, Tularemia, etc., have received due attention. The chapter dealing with Pneumococci has been enlarged to include the new types. The chapter on Complement Fixation has been fully revised and the details regarding the newer Precipitin tests, especially those of Kahn, Kline and Meinkie, are added.

HUMAN HELMINTHOLOGY

A Manual for Clinicians, Sanitarians and Medical Zoölogists

By ERNEST CARROLL FAUST, PH.D.

Professor of Parasitology in the College of Medicine of Tulane University, New Orleans, Louisiana

Octavo, 616 pages, illustrated with 297 engravings. Cloth, \$8.00, net

In this important new work there is offered for the first time a complete and authoritative discussion of the subject of human helminthology. Although in no phase of medical zoölogy, both in its biological and clinical aspects, has greater progress been made than in helminthology, hitherto most of this progress has been published in inaccessible scientific journals, and it was not, therefore, easily available. The present volume is the result of the author's own need for a teaching and reference text.

*New Work**Just Ready*

THE AUTONOMIC NERVOUS SYSTEM

By ALBERT KUNTZ, PH.D., M.D.

Professor of Anatomy in St. Louis University School of Medicine

Octavo, 576 pages, illustrated with 70 engravings. Cloth, \$7.00, net

In this entirely new work Dr. Kuntz has supplied a great need in a practical way. He presents a readable summary of all our knowledge to date concerning the autonomic nervous system. The autonomic innervation of all the systems of organs of the body is first considered in an orderly sequence. Illustrations, many of which are photographs of actual dissections, aid the reader in his understanding of this heretofore most difficult branch of anatomy. An interesting outline of the pathology follows. The subject of visceral sensitivity and referred pain is fully considered from every angle.
