

from 1 cc to 7 cc per kg. One animal received a single intravenous injection of 100 cc of extract and showed no changes.

Bilaterally adrenalectomized dogs which are treated with adequate daily dosage of the adrenal cortical extract do not differ in their behavior, or in the blood concentration of the substances mentioned, from normal animals. Weight is maintained, appetite, pulse rate at rest, and rectal temperature is normal, and the body skin and hair are kept in fairly good condition.

When the bilaterally adrenalectomized animal, in a good state of nutrition, with well-healed wounds and without infection, is deprived of adequate injections of cortical extract, either abruptly or by gradual reduction of dosage to less than 1/6 cc per kg daily, the first significant change we have observed is a rise in blood non-protein nitrogen and urea. This is coincident with or may precede by a few hours the refusal of food, and definitely precedes the drop in respiratory metabolism which is also a constant observation. Changes in blood creatinine do not occur until the animal is very ill. The serum potassium concentration rises steadily during the period of insufficiency. The secretion of urine diminishes markedly and there is a suppression of urinary nitrogen and urea. The chloride and inorganic phosphate excretion is suppressed when the animal begins to refuse food and if the insufficiency is allowed to go to the point where urinary secretion is very low or almost suppressed there is a diminution of creatin and creatinine excretion as well as that of injected phenol sulphonephthalein. In the earlier stages of insufficiency, however, suppression of total nitrogen and of urea nitrogen occur before the excretion of creatinine and creatin lessens. No microscopic changes are found in the urine, but small amounts of albumin are quite regularly present during insufficiency. Marked and rapid loss of weight occurs where there is diarrhea or vomiting. The muscular weakness, lowering of body temperature, characteristic gait, and psychic symptoms of dogs in advanced insufficiency have been adequately described by various writers. Lowering of the systolic blood pressure does not usually occur until after the nitrogen retention has become well established. In animals which subsequently recover, following injection of adequate amounts of extract, the oxygen consumption may drop at the time of maximum insufficiency to 20-25 per cent. below the normal value at which time the R.Q. also has fallen to 0.72-0.71. Injection of extract is then followed by a diuresis which may last for 48-96 hours and is accompanied by increased excretion of urinary nitrogen and urea, and of chlorides. At the same time the animal gains rapidly in weight and his appetite returns. The

respiratory metabolism usually returns slowly and the R.Q. more rapidly to their original levels. These changes precede or approximately parallel the return of the blood non-protein nitrogen and urine excretion nitrogen to their previous values. The fall in serum potassium concentration parallels that of the non-protein nitrogen. The delay in return to normal of this blood non-protein nitrogen and urea appears to be more marked following each subsequent period of adrenal insufficiency, a phenomenon which we have also noted in clinical studies on Addison's disease to be reported later.

We are now utilizing the early change in blood non-protein nitrogen and urea as a means of biological assay of the strength of different lots of cortical extract in adrenalectomized dogs. Studies of the effect of the extract and of its deprivation upon kidney function and upon anatomical renal damage are also in progress.

## BOSTON UNIVERSITY SCHOOL OF MEDICINE

ORGANIZED IN 1873

ANNOUNCEMENT

may be obtained by application to

THE REGISTRAR

80 East Concord Street

Boston

Massachusetts

## CARNEGIE INSTITUTION OF WASHINGTON

Publications of the Institution present in monographic form the results of its own research activities, and include a few books on other subjects.

Nearly 600 volumes have been issued, representing studies in the following fields:

<b>Archaeology</b>	<b>History</b>
<b>Anthropology</b>	<b>Literature</b>
<b>Astronomy</b>	<b>Mathematics</b>
<b>Biology</b>	<b>Nutrition</b>
<b>Botany</b>	<b>Palaeontology</b>
<b>Chemistry</b>	<b>Palaeography</b>
<b>Ecology</b>	<b>Philology</b>
<b>Economics</b>	<b>Physics</b>
<b>Embryology</b>	<b>Terrestrial Magnetism</b>
<b>Genetics</b>	<b>Zoology</b>
<b>Geology</b>	

Descriptive lists and prices may be obtained by addressing:

**CARNEGIE INSTITUTION OF WASHINGTON**  
WASHINGTON, D. C.

## School of Medicine and Dentistry University of Rochester

Medical School, Strong Memorial Hospital, School of Nursing and Out-Patient Department of the University of Rochester and the Municipal Hospital of the City of Rochester, all under one roof. Medical, Surgical, Obstetric, Pediatric, Dental, Contagious and Neurological patients admitted. Unusual opportunities for school and hospital coöperation in medical and graduate dental teaching.

### Admission

Medical candidates must have completed three years of college work with special requirements in chemistry, physics and biology. The entering class will not exceed 50, men and women being admitted on equal terms.

### Tuition

Charge for tuition will be \$400 per annum, payable in equal installments at the beginning of each semester.

For information address

**THE DEAN**  
School of Medicine and Dentistry  
Crittenden Boulevard, Rochester, N. Y.

## THE WISTAR INSTITUTE BIBLIOGRAPHIC SERVICE

A condensed summary of each paper appearing in the journals listed below is issued prior to publication of the article in full. This distribution of abstracts enables a biologist to familiarize himself with *contemporary research* in a minimum of time, and to select the articles which he wishes to purchase in reprint form. To receive these abstracts he may subscribe to the Advance Abstract Sheets or to the Bibliographic Service Cards.

The Advance Abstract Sheets are issued twice a month, each sheet containing ten or more abstracts, together with the price per reprint. Subscription rate is \$3.00 per year.

The cards also are issued twice a month. In addition to the abstracts, the cards provide subject headings and complete bibliographic reference. The cards are convenient for filing and library records. Price, \$5.00 per year.

At regular intervals the abstracts are assembled and published in book form with complete analytical index. Price, \$5.00 per volume.

**Journal of Morphology and Physiology**  
**The Journal of Comparative Neurology**  
**The American Journal of Anatomy**  
**The Anatomical Record**  
**The Journal of Experimental Zoology**  
**American Anatomical Memoirs**  
**American Journal of Physical Anthropology**  
**Folia Anatomica Japonica (Tokyo, Japan)**  
**Physiological Zoology (Chicago, Illinois)**  
**Stain Technology (Geneva, New York)**  
**Ecological Monographs (Durham, North Carolina)**

Philadelphia, Pa., U. S. A.

## Latest McGraw-Hill Books

### Recording Sound for Motion Pictures

Edited by LESTER COWAN for the Academy of Motion Picture Arts and Sciences. 404 pages, 6 x 9. \$5.00.

The material for the courses at the Academy of Motion Pictures, Arts and Sciences has been expanded and revised and is now offered in book form. The book includes discussions of sound recording equipment, the film record, the technique of studio acoustics and sound reproduction.

### Lohmann's Principles of City Planning

By KARL B. LOHMANN, Professor of Landscape Architecture, University of Illinois. 395 pages, 6 x 9, 153 illustrations. \$4.00.

A carefully organized discussion of the elements and principles of the various branches of city planning. The book takes up the scope of such work, its importance, its possibilities and means of accomplishment.

### Newton's Opticks: or a Treatise of the Reflections, Refractions, Inflections and Colours of Light

By SIR ISAAC NEWTON. Reprinted from the fourth edition. With a Foreword by PROFESSOR ALBERT EINSTEIN, Nobel Laureate, and an Introduction by PROFESSOR E. T. WHITTAKER. A Whittlesey House Publication. 414 pages, 4½ x 7½, 57 illustrations. \$2.50.

This book is an exact reprinting of the corrected fourth edition of *Opticks*, published in London, England, in 1730, three years after Newton's death.

### East's Biology in Human Affairs

Edited by EDWARD M. EAST, Professor of Genetics, Harvard University. A Whittlesey House Publication. 399 pages, 6 x 9. \$3.50.

A series of twelve relatively non-technical discussions, by twelve leading scientists, of the present conditions of several of the more important sub-divisions of biology, emphasizing recent advances and expressing a few conservative predictions as to probable future trends.

### Emmons' Geology of Petroleum—New Second Edition

By WILLIAM HARVEY EMMONS, Professor and Head of Department of Geology and Mineralogy, University of Minnesota; Director, Minnesota Geological Survey; Formerly Geologist, Section of Metalliferous Deposits, United States Geological Survey. Second edition. 736 pages, 6 x 9, 435 illustrations. \$6.00.

This book is intended as a textbook and manual of the geology and deposits of oil-bearing areas. Essentially all of the world's oil fields are covered, with references to the important literature.

## Announcing Two New Wiley Books ▶ IN PHYSICS ◀

### Fundamentals of Electricity and Magnetism By Leonard B. Loeb

*Professor of Physics, University of California*

This volume is designed as a textbook in undergraduate courses in the subject. Emphasis is laid on the fundamental concepts of electricity as developed in the organization of the material around a system of fundamental concepts; three fundamental and three derived, and defining electrical units of measurement in terms of the three systems, electro-magnetic, electro-static, and practical. The book contains an excellent historical treatment of the development of electricity, and except for the last chapter all equations and formulas are clearly explained. A chapter on the fundamental physics of the photo-electric and thermionic effect is added in order to meet the demand for fundamental knowledge of these subjects. The book contains a set of illustrative problems giving practice in the application of the laws.

432 pages      6 by 9      Price, \$4.00

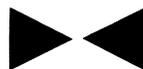

### The Nature of a Gas By Leonard B. Loeb

This is an exceptionally clear presentation of the essential facts covering atomic and gaseous structure. The volume is brief and concise but gives all the necessary data on the breakdown of solid and liquid dielectrics. The book is developed in an interesting and logical manner and is the only compilation of reliable data on electrical properties of gases. It will appeal to physicists, chemists, electrical engineers and all those who work with electrical problems in which a gas is either used as insulator or conductor or where its presence modifies the main phenomenon.

This volume is the first of a series of monographs to be published under the auspices of the Committee on Electrical Insulation of the Division of Engineering and Industrial Research, National Research Council, with J. B. Whitehead, Dean of Engineering at Johns Hopkins University, as Chairman.

134 pages      6 by 9      Price, \$2.50
