

CASTLE INCUBATORS

famous for
Precision
under all service conditions

The famous 554 Castle Incubator

1° ± Uniformity: Never more than one degree variation between top and bottom of chamber.

1/5 to 1/10° ± Constancy: Never more than a fraction of a degree variation at the thermometer. This accuracy of temperature holds up to a room temperature of 95° F.

98% Usable Capacity: Practically no space in chamber is wasted by heaters or controls. Four removable shelves.

Advanced engineering and highest quality in every detail of construction

Precision Measuring Instruments

Made by P. J. Kipp & Zonen

USING the highly light-sensitive Moll Thermo-Element, Kipp & Zonen build a number of Precision Instruments for measuring heat radiation and intensity and movements of beams of light for use in spectrum analysis, photometry of photographed star images, for indicating very small galvanometer deflections, etc.

By special arrangement with Kipp & Zonen, we import apparatus of their manufacture, and relieve our customers entirely of all details incident to shipping and Customs formalities.

Catalogs (in English) will be mailed to interested scientists upon request.

Moll Thermo-Element with adjustable mounting.
