

SCIENCE

VOL. 78

FRIDAY, AUGUST 25, 1933

No. 2017

<i>Cosmic-ray Light on Nuclear Physics:</i> PROFESSOR ROBERT A. MILLIKAN	153	<i>Societies and Meetings:</i> <i>The New Hampshire Academy of Science:</i> DR. THOMAS G. PHILLIPS. <i>Summer Meeting of the Minnesota Academy of Science</i>	172
<i>A History of the National Research Council, 1919-1933. VIII. Division of Anthropology and Psychology:</i> PROFESSOR A. T. POFFENBERGER	158	<i>Scientific Apparatus and Laboratory Methods:</i> <i>A Micro Vessel for Glass Electrode Determinations of Hydrogen-ion Activity of Biological Fluids:</i> PROFESSOR IVON R. TAYLOR and JAMES H. BIRNIE	172
<i>Scientific Events:</i> <i>Beit Memorial Fellowships; The McDonald Observatory; Curtailment of the Federal Scientific Bureaus; Dinner in Honor of Forty-two Distinguished Chemists; Obituary</i>	161	<i>Special Articles:</i> <i>The Rôle of Peroxidase in the Deterioration of Frozen Fruits and Vegetables:</i> M. A. JOSLYN and G. L. MARSH. <i>Development of Cercaria macrostoma Faust into Proterometra macrostoma:</i> MARGERY W. HORSFALL	174
<i>Scientific Notes and News</i>	164	<i>Science Service</i>	5
<i>Discussion:</i> <i>The Natural Occurrence of Crown Gall on the Giant Cactus:</i> PROFESSOR J. G. BROWN and M. M. EVANS. <i>The Specificity of Frog Flukes:</i> DR. LLOYD G. INGLES. <i>Post-bolson Faulting in New Mexico:</i> PROFESSOR C. L. DAKE and L. A. NELSON. <i>Fenstreams:</i> PROFESSOR R. J. HOLDEN. <i>Selective Absorption of Ions not Confined to Young Rootlets:</i> PROFESSOR F. J. CRIDER	167		
<i>Scientific Books:</i> <i>Recent Zoological Text-books:</i> PROFESSOR A. S. PEARSE	170		

SCIENCE: A Weekly Journal devoted to the Advancement of Science, edited by J. McKEEN CATTELL and published every Friday by

THE SCIENCE PRESS

New York City: Grand Central Terminal

Lancaster, Pa.

Garrison, N. Y.

Annual Subscription, \$6.00

Single Copies, 15 Cts.

SCIENCE is the official organ of the American Association for the Advancement of Science. Information regarding membership in the Association may be secured from the office of the permanent secretary, in the Smithsonian Institution Building, Washington, D. C.

COSMIC-RAY LIGHT ON NUCLEAR PHYSICS¹

By Dr. ROBERT A. MILLIKAN

CALIFORNIA INSTITUTE OF TECHNOLOGY

(1) ENERGY RELATIONS COMPATIBLE WITH ASTON'S CURVE

It was Aston's success in 1927 in measuring with his isotope method the exact masses of most of the elements and then in plotting a smooth curve connecting the mass of the hydrogen atom as it appeared in each element against the atomic weight that first gave us a quantitative, thermodynamic way of getting definite information about nuclear transformations. For if the mass-energy equation of Einstein, $E=mc^2$ (1905), was a valid generalization—and every week is now adding new proof of its validity—it and Aston's curve together told at once what kind of nuclear transformations were possible and what impossible among the 92 elements which make up the

entire physical world as we now know it. Cameron and I then first tested whether this method would predict correctly the observed release of energy in known radioactive transformations, and its success in so doing² at once emboldened us to try to use it for the interpretation of the banded structure of the cosmic rays brought sharply to light by our 1925 and 1927 and 1928 studies of the absorptive characteristics of these rays as a function of depth beneath the surface of the atmosphere. These measurements, carried out in deep mountain lakes, extended from about 8 equivalent meters of water beneath the top of the atmosphere to 80 meters, and could only be interpreted as due to three or more cosmic-ray bands, to the absorption coefficients of which per meter of water we had given at that time the values .35, .08, .04 and .02, respectively,³ though we pointed out with great care

¹ Address delivered at the "Century of Progress" meeting of the American Association for the Advancement of Science held in Chicago on the evening of June 21, 1933. It immediately followed Dr. F. W. Aston's address on "The Story of the Isotopes," SCIENCE, 78: 5, 1933.
