## THE THIRD MINNEAPOLIS MEETING OF THE AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Edited by Dr. HENRY B. WARD

PERMANENT SECRETARY

### INTRODUCTION

THE North Central section of the country has welcomed the association for six of its ninety-six meetings thus far held. The twenty-first meeting was held at Dubuque in August, 1872, and was the first in this territory. The next was held at Minneapolis in August, 1883; this was the thirty-second meeting of the association. Just a decade later the forty-second meeting was held at Madison, Wisconsin, in August, 1893. In December, 1910, the sixty-second meeting was held in Minneapolis, and in December, 1929, the eighty-sixth meeting was held at Des Moines, Iowa. The meeting just closed was the ninety-sixth of the association and the third to be held in Minneapolis. It will

be noted that three of these six were summer meetings held under the old schedule according to which summer meetings were the rule. Then came the change to winter meetings and two such have fallen in this territory. Under the most recent plan by which two meetings are held each year the association went to Minneapolis this summer and has found the experiment in all ways successful.

On this occasion, as at previous Minneapolis meetings, the University of Minnesota placed all its facilities at the disposal of the association and its associated societies. All the sessions were held in buildings on the university campus or the university farm campus, with the exception of a single day,
